Comprehensive Cluster Utilization Report

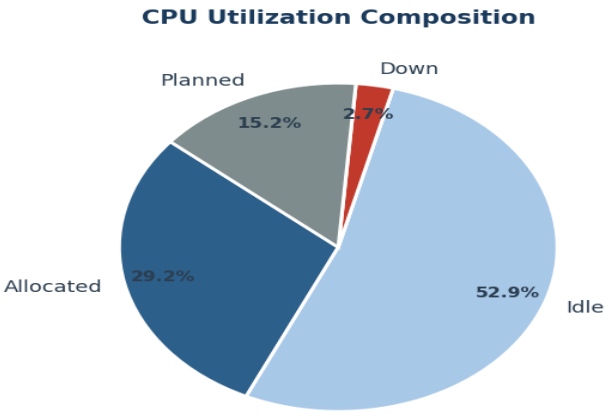

Cluster	FORTYTWO
Report Period	2025-10-01 → 2025-12-30
Generated	2026-06-12 06:01
Report Type	CPU · GPU · Account · User Analysis

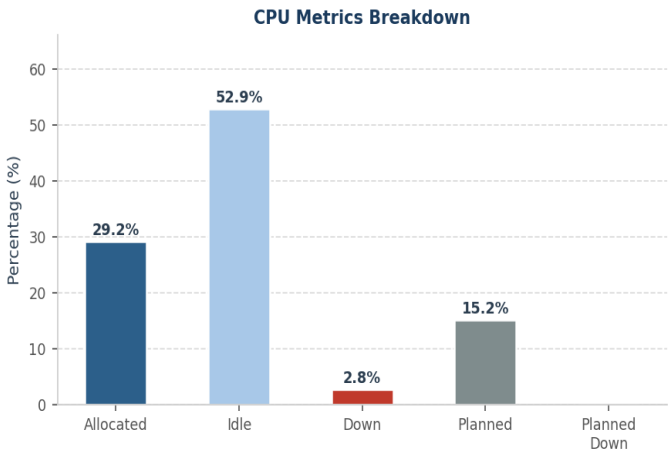

Executive Summary

Metric	CPU	GPU
Allocated %	29.22%	49.74%
Idle %	52.86%	47.82%
Down %	2.75%	2.44%
Planned %	15.18%	0.00%
Reported %	100.00%	100.65%

CPU Utilization Analysis

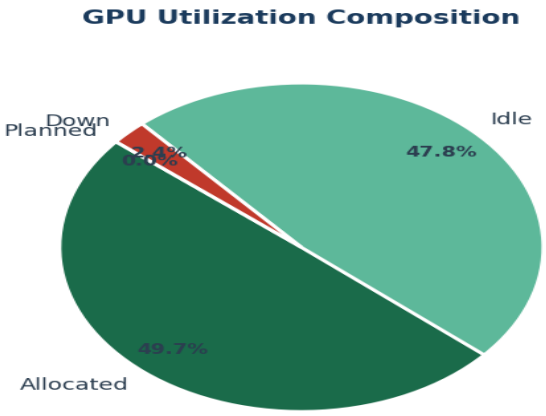

Metric	Value	Description
Allocated	29.22%	Resources actively in use
Idle	52.86%	Resources available but unused
Down	2.75%	Resources unavailable / maintenance
Planned	15.18%	Reserved for planned use
Planned Down	0.00%	Planned for downtime
Reported	100.00%	Total accounted utilization

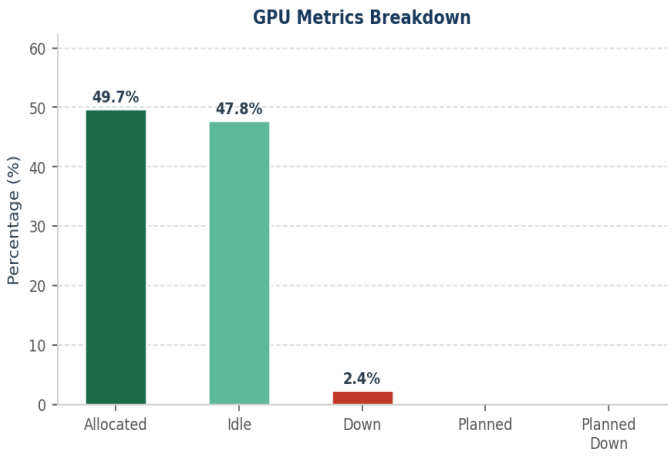

GPU Utilization Analysis

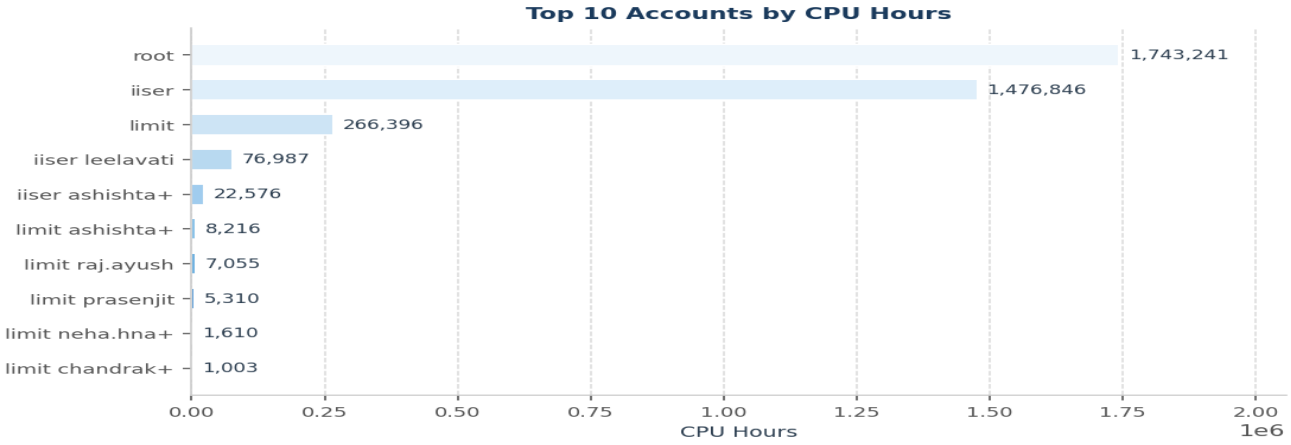

Metric	Value	Description
Allocated	49.74%	Resources actively in use
Idle	47.82%	Resources available but unused
Down	2.44%	Resources unavailable / maintenance
Planned	0.00%	Reserved for planned use
Planned Down	0.00%	Planned for downtime
Reported	100.65%	Total accounted utilization

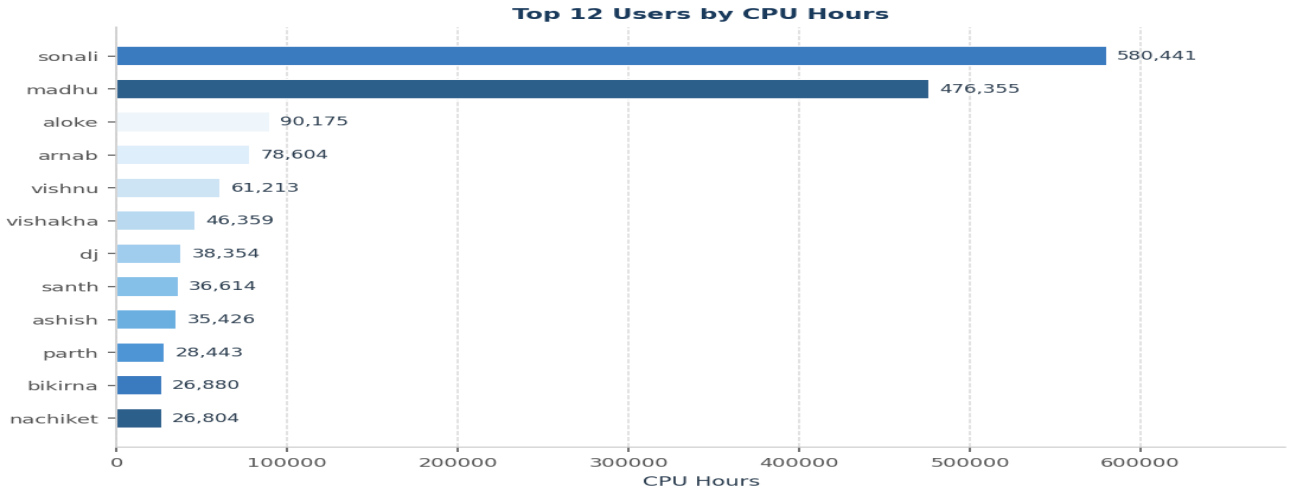

Resource Consumption by Account

Account	CPU Hours	Usage %	Active Users
root	1,743,241	29.22%	0
iiser	1,476,846	24.75%	29
limit	266,396	4.46%	18
iiser leelavati	76,987	1.29%	0
iiser ashishta+	22,576	0.38%	0
limit ashishta+	8,216	0.14%	0
limit raj.ayush	7,055	0.12%	0
limit prasenjit	5,310	0.09%	0
limit neha.hna+	1,610	0.03%	0
limit chandrak+	1,003	0.02%	0

Top Users by Resource Consumption

User (Login)	Proper Name	Account	CPU Hours	Usage %
sonali	—	iiser	580,441	9.73%
madhu	—	iiser	476,355	7.98%
aloke	—	limit	90,175	1.51%
arnab	—	iiser	78,604	1.32%
vishnu	—	iiser	61,213	1.03%
vishakha	—	limit	46,359	0.78%
dj	—	limit	38,354	0.64%
santh	—	limit	36,614	0.61%
ashish	—	iiser	35,426	0.59%
parth	—	iiser	28,443	0.48%
bikirna	—	iiser	26,880	0.45%
nachiket	—	iiser	26,804	0.45%

Summary Observations

The following observations are automatically generated based on cluster data for the period 2025-10-01 to 2025-12-30.

1. CPU utilization is low (29.2% allocated). Significant idle capacity available.
2. CPU idle time is high (52.9%). Scheduling optimization may improve throughput.
